

There were issues affecting this run of Lighthouse:

- There may be stored data affecting loading performance in this location: IndexedDB. Audit this page in an incognito window to prevent those resources from affecting your scores.
- The page may not be loading as expected because your test URL (<https://www.avito.ru/>) was redirected to <https://m.avito.ru/>. Try testing the second URL directly.

## Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues

and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

## NAMES AND LABELS

- ▲ Buttons do not have an accessible name

- ▲ Links do not have a discernible name

- ▲ Image elements have `[alt]` attributes that are redundant text.

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

## BEST PRACTICES

- ▲ `[user-scalable="no"]` is used in the `<meta name="viewport">` element or the `[maximum-scale]` attribute is less than 5.

These items highlight common accessibility best practices.

## CONTRAST

- ▲ Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

## NAVIGATION

- The page contains a heading, skip link, or landmark region

These are opportunities to improve keyboard navigation in your application.
